## 数据库使用指南

◆ **收录年限：** 1887 年至今

◆ **主题范畴：** 多元化的学术研究领域，包括生物科学、医学、工程技术、社会科学、心理学、教育、法律、语言学、人文、信息科技、通讯传播、公共管理、历史学、计算机科学、军事、文化、健康卫生医疗、宗教与神学、艺术、视觉传达、表演、哲学、各国文学等等。

◆ **数据内容：** 14,100多种刊物的索摘，4,780多种全文期刊[其中4,000多种为同行评审(peer-reviewed)]及 230多种非期刊类全文出版物, 如书籍专著及会议论文等。特别是ASP有近2000种全文期刊同时收录在SCI/SSCI/AHCI。
Business Source® Premier

Powered by EBSCOhost®

收录年限： 1886年~至今

主题范畴： 涵盖商业相关领域的议题，如金融、银行、国际贸易、商业管理、市场行销、投资报告、产业报导、房地产、经济评论、经济学、企业经营、财务金融、能源管理、信息管理、知识管理、 工业工程管理、保险、法律、税收、电信通讯等。

数据内容： 约收录 5,100多种期刊索引及摘要，其中逾2,200种全文期刊（1130多种期刊为同行评审）及10,000多种非刊全文出版物 (如案例分析, 专著, 国家及产业报告等)。独特的全文期刊如：*Administrative Science Quarterly, Academy of Management Journal, Academy of Management Review, MIS Quarterly, International Journal of Production Research*等。还同时收录：Business Monitor Intl.、Datamonitor Plc.、EIU: Economist Intelligence Unit、Global Insight Inc.等1400多种知名出版社出版的国家/地区报告。

基本检索

直接在检索框中输入检索词，如果需要设定其它检索命令，可以点击检索选项（Search Options）。

文件夹除了保存检索结果，还可保存图片
视频、检索永久链接、检索命令、检索快报、期刊快报等。通过文件夹，读者可以将保存的文献打印、发送
邮件、保存或导出检索结果、图片或视频。
在文件夹中还可以创建自定义的文件夹，方便针对保存的资料进行管理。只需点击New新建，输入设定的文件夹名称，点击保存即可。

自定义的文件夹添加至我的自定义（**My Custom**）区域；选择我的文件夹（**My Folder**）区域中的文献，选择复制（**Copy to**）或者移动至（**Move to**），将所需文献保存到不同名称下的自定义文件夹。

点击检索历史（Search History）可以查看本次登录的全部检索历史记录。可以打印或保存检索历史。

检索历史

点击检索历史（Search History），可以通过勾选每一次检索历史前面的复选框以及按照所需的检索逻辑关系and或or，合并几次检索再作进一步的检索。

查看结果（View Results）可以查看历次检索历史记录，检索结果数量统计也有呈现；查看详细（View Details）可以查看每条记录的详细结果页面，Edit可以进行修改编辑。

点击保存检索（Save Searches/Alerts）可以临时保存所需检索策略及结果，如果希望永久保存，则需要登录个人文件夹。

Digital Libraries: Functionality, Usability, and Accessibility

Dr Mayank Trivedi
University Librarian
Sardar Patel University
Vallabhvidyanagar-388120, Gujarat, India

Introduction

Rapid advances in information technologies have revolutionized the role of libraries. As a result, libraries face new challenges, competitors, demands, and expectations. Libraries are redesigning services and information products to add value to their services and to satisfy the changing information needs of the user community. Traditional libraries are still handling largely printed materials that are expensive and bulky. Information seekers are no longer satisfied with only printed materials. They want to supplement the printed information with more dynamic electronic resources. Demands for digital information are increasing.

Digital libraries will start gaining ground in India in the present century. We are heading toward an environment in which digital information may substitute for much print-based information. A library's existence does not depend on the physical form of documents. Its mission is to link the past and the present, and help shape the future by preserving the records of human culture, as well as integrating emerging information technologies. This mission is unlikely to change in the near future.

Digital libraries come in many forms. They attempt to provide instant access to digitized information and consist of a variety of information, including multimedia.

Definition

A digital library is a library in which collections are stored in digital formats (as opposed to print, microform, or other media) and accessible by computers. The content may be stored locally, or accessed remotely. The first published use of the term may have been in a 1988 report to the Corporation for National Research Initiatives. The term was first popularized by the NSF/DARPA/NASA Digital Libraries Initiative in 1994. Bush (1945) created a vision based on experience ("Digital library.")

The Digital Library Federation defines digital libraries as:

Organizations that provide the resources, including the specialized staff, to select, structure, offer intellectual access to, interpret, distribute, preserve the integrity of, and ensure the persistence over time of collections of digital works so that they are readily available for use by a defined community or set of communities. (Shiri 2003)

The DELOS Digital Library Reference Model defines a digital library as:

An organization, which might be virtual, that comprehensively collects, manages and preserves for the long term rich digital content, and offers to its user communities specialized functionality

说明和验证 - EBSCOhost iPhone 和 Android 应用程序

2012-05-02 20:00

尊敬的 EBSCOhost 用户，

要开始使用 EBSCOhost iPhone 和 Android 应用程序，请遵循下面的说明。 and Android applications, follow the instructions below.

步骤 **1**：
从 iTunes 商店或 {android_market_url}Android 电子市场下载应用程序 or Android Market

步骤 **2**：
在您的设备上查看此电子邮件，然后轻触 验证密钥

（注：必须通过您的设备在步骤 2 中访问此链接。此激活链接将在 24 个小时后过期。）

有问题？请访问 支持页面 或发送电子邮件至 support@ebsco.com。

谢谢！

Objective Assessment of Psoriasis Lesion Thickness for PASI Scoring using 3D Digital Imaging

M.H. Ahmad Fadzil, Hurriyatul Fitriyah, Esa Prakasa, Hermawan Nugroho, S.H. Hussein, Azura Mohd. Affandi

Abstract—Psoriasis is a chronic inflammatory skin condition which affects 2-3% of population around the world. Psoriasis Area and Severity Index (PASI) is a gold standard to assess psoriasis severity as well as the treatment efficacy. Although a gold standard, PASI is rarely used because it is tedious and complex. In practice, PASI score is determined subjectively by dermatologists, therefore inter and intra variations of assessment are possible to happen even among expert dermatologists. This research develops an algorithm to assess psoriasis lesion for PASI scoring objectively. Focus of this research is thickness assessment as one of PASI four parameters beside area, erythema and scaliness. Psoriasis lesion thickness is measured by averaging the total elevation from lesion base to lesion surface. Thickness values of 122 3D images taken from 39 patients are grouped into 4 PASI thickness score using K-means clustering. Validation on lesion base construction is performed using twelve body curvature models and show good result with coefficient of determinant (R^2) is equal to 1.

Keywords—3D digital imaging, base construction, PASI, psoriasis lesion thickness.

I. INTRODUCTION

PSORIASIS is a chronic inflammatory skin condition which is caused by speed-up replacement of human skin cell. Psoriasis can affect any stage of life, but it usually occurs during second and third decades of life. Psoriasis also occurs in any gender or race with equal amount of male and female; 2 to 3% of population is living with psoriasis [1].

There are seven types of psoriasis based on the symptom and appearance which are plaque psoriasis, pustular psoriasis, exfoliative psoriasis, guttate psoriasis, flexural psoriasis, erythodermic psoriasis, and psoriasis arthritis. About 80% of psoriasis case is plaque psoriasis [2]. Plaque psoriasis appears with silvery-white scales on top of red and thick patches. Silvery-white scales are skin shedding as the result of speed-up growth of the skin cell. Red patches are due to increasing amount of blood vessels to support the speed-up growth.

M.H. Ahmad Fadzil, Hurriyatul Fitriyah, Esa Prakasa, Hermawan Nugroho are with the Electrical and Electronics Engineering Department, Universiti Teknologi Petronas, Bandar Seri Iskandar, Tronoh, Perak 31750 Malaysia (e-mail: fadzmo@petronas.com.my, hfitriyah@gmail.com, esa.prakasa@informatika.lipi.go.id, dewa132@yahoo.com).
S.H.Hussein, Azura Mohd. Affandi are with the Dermatology Department, Hospital Kuala Lumpur, Jalan Pahang, Kuala Lumpur 50568 Malaysia (e-mail: sumaiya.hussein@gmail.com, azum@yahoo.co.uk)

Dermatologists use 4 types of treatments to cure psoriasis: topical therapies, ultraviolet lights, systemic medication and the latest one is biological injection [3]. Treatment applied depends on psoriasis severity level and patient condition. For mild to moderate psoriasis, dermatologists apply topical therapies. For moderate to severe psoriasis, dermatologists apply UV light therapies and systemic medication. Dermatologists have to monitor patient's condition as the UV light therapies and systemic medication give side effects. The latest treatment found, biological injection, is only for severe psoriasis where topical therapies, ultraviolet lights, and systemic medication treatments can not cure the psoriasis. This injection blocks certain immune cell (T cell) to act, as this speed-up growth of skin cell is the cause of psoriasis. Biological injection also alters the immune response to the skin cell's growth.

Dermatologists use their knowledge and experience to decide which treatment to be applied. Patient's physical condition which differs from one another also needs to be noted. Treatment may include combination of several treatments to increase the treatment efficacy and reduce side effects. Dermatologists also change dosage and rotate the treatment. In every visit, dermatologists need to assess patient's psoriasis severity as well as monitor the treatment efficacy.

The gold standard to assess psoriasis is Psoriasis Area and Severity Index (PASI) [4]. In PASI calculation, human body is divided into 4 regions: head, trunk, upper extremities and lower extremities. Each body region has 4 parameters that need to be determined which are psoriasis area, erythema (redness), thickness, and scaliness. Each body region is weighted differently regarding the proportion of Body Surface Area (BSA). Head is weighted 0.1, trunk is 0.3, upper extremities is 0.2 and 0.4 for lower extremities. PASI scoring is calculated using (1).

$$PASI = 0.1(R_h + T_h + S_h)A_h + 0.2(R_u + T_u + S_u)A_u + 0.3(R_t + T_t + S_t)A_t + 0.4(R_l + T_l + S_l)A_l \quad (1)$$

A is for area (score 0-6), R is redness (score 0-4), T is thickness (score 0-4), S is scaliness (score 0-4), h is for head
